MAKING REVOLUTION IS THE TASK OF THE PEOPLES OF THE WORLD

On the 94th anniversary of the Communist Party of Perú, we reaffirm ourselves with renewed proletarian optimism in following the shining example of our teacher and guide, Chairman Gonzalo, a great Marxist-Leninist-Maoist, the greatest revolutionary in Peruvian history.

One year after his passage to immortality, our Party armed with Gonzalo Thought comes out once again in defense of proletarian revolution, fighting the vile anti-communist campaign of world reaction and its henchmen in our country.

- I. The current crisis of the capitalist system puts back on the agenda, as Marx foresaw, the need for the socialist revolution as the only way to emancipate the working class and humanity, and the need for the Communist Party as a conscious proletarian vanguard to lead the town on that path.

In *Communist Party Manifesto* Marx taught us:

«The communists consider it unworthy to hide their ideas and purposes. They openly proclaim that their goals can only be achieved by violently overthrowing the entire existing social order. Let the ruling classes tremble in the face

of a communist revolution. The proletarians have nothing to lose but their chains. Instead, they have a world to win. PROLETARIANS OF ALL COUNTRIES, UNITE!».

In these Marxist principles, we communists of yesterday, today and tomorrow reaffirm ourselves and will always reaffirm ourselves.

II. In October we remember two gigantic milestones in the history of humanity:

In 1917, under Lenin's leadership, the Great October Socialist Revolution triumphed in Russia, ushering in a new era in history: the Era of the World Proletarian Revolution. The long-awaited socialism began to be built in the largest country on the planet.

In 1949, the New Democratic Revolution in China, led by Chairman Mao Tse-tung, triumphed, after 22 years of ardent People's War, the socialist revolution continued without interruption, and then the cultural revolution was developed, to ensure the continuation of revolution. Socialism began to be built in the most populous country on Earth.

A powerful socialist camp that encompassed a third of humanity was transforming backward countries into prosperous nations, it was socialising the means of production, it was liberating the productive forces, it was planning the

economy, it was improving the life of the broad popular masses, it was putting science at the service of the people, it was shaping a proletarian culture and art, it was applying democracy for the people and dictatorship against its enemies, it was organising soviets, popular communes and revolutionary committees, everything that showed that socialism was not utopia, but a grandiose transforming reality for the benefit of working masses.

That great stage of world proletarian revolution gave us Marxism-Leninism-Maoism, mainly Maoism, which is still fully valid.

And if capitalist restoration —promoted and organised by imperialism, revisionism and world reaction— managed to temporarily seize power from working class, the latter will conquer it again, following people's law: to fight, to fail, to fight again until final victory, because socialism is the new and it will necessarily prevail.

- III. A year ago the life of our beloved and respected Chairman Gonzalo was taken from us. The communists and revolutionaries of the world condemn the impunity of his assassination and we hold high his undefeated flags. The Communist Party of Perú, with unalterable firmness, reaffirms itself in learning from Chairman Gonzalo and in embodying

Gonzalo Thought, our strategic, specific and main ideological weapon.

Wielding the great contributions of our President, we uphold Maoism as the new, third and superior stage of the ideology of the proletariat, we fight for it to be the command and guide of world revolution, we fight for the regrouping of Marxist-Leninist-Maoist communist parties, and we proclaim that making revolution is the task of the peoples of the world.

We condemn the world anti-communist crusade promoted and financed by imperialism, a campaign sinisterly implemented by DIRCOTE, intelligence services and extreme right-wing in Perú, and we resolutely come out in defense of socialism and communism.

We mark with fire the revisionist traffic of those who deny the development of Gonzalo Thought after his capture in 1992 and artfully dare to usurp the name of the Party that our President led until his last breath.

In the current situation of capitalist crisis, with a sharp intensification of the inter-imperialist contradictions that show the prelude of Third World War for a new division of the world, the peoples must oppose proletarian revolution to imperialist war, prepare the development of People's War to defeat counterrevolutionary war and, with the great ex-

perience gained, rebuild socialism, more vigorous and invincible, towards a classless society, the future communism.
