WE CONDEMN THE IMPUNITY OF THE ASSASSINATION OF CHAIRMAN GONZALO!

Before the proletariat and the Peruvian people we denounce once again the impunity for the murder of President Gonzalo and the systematic violation of his rights during his imprisonment in the Military Penitentiary of the Callao Naval Base.

It was not enough for the Peruvian State to systematically violate the fundamental rights of Chairman Gonzalo during the 29 years that they kept him prisoner in the Military Penitentiary of the Callao Naval Base, in an illegal and inhuman regime of confinement, isolation and in communication, without respect for the condition of person and his dignity, nor his condition as an old man, at 86 years old, and with chronic illnesses that were never treated. With monstrous revenge, on 11th September 2021, a sophisticated plan of extermination and murder was carried out, and in a dastardly and perverse act they burned and made his remains disappear.

The assassination of Chairman Gonzalo has been part of the persecution, discrimination and systematic violation of fundamental rights that the State carries out against the Marxist-Leninist-Maoists, Gonzalo Thought, today extended against popular protest. It is an endless persecution, mainly against the

communists, persecution against those of us who participated in the people's war of the years 80-92, and against those of us who advocate a political solution, general amnesty and national reconciliation.

This policy of persecution, discrimination and systematic violation of fundamental rights has as its distinctive feature the genocidal policy applied by the Peruvian State to confront the People's War, which it called "terrorism", developing a counter-subversive war with torture, disappearances, extrajudicial executions, genocide of entire towns in the countryside and genocide of prisoners in prisons; an anti-subversive legislation used as a weapon of counter-subversive war, whose content is the Criminal Law of the Enemy imposed in Perú more than 40 years ago and applied with the greatest cruelty against Chairman Gonzalo.

In application of this genocidal and extermination policy, he was kept for 29 years in a military prison in the worst prison conditions, subjected to a regime of torture, cruel and inhuman treatment without due care for his health or consideration for his elderly condition; all as part of a sophisticated extermination plan, murdering him to punish anyone who dares to stand up and fight against the system of oppression and capitalist exploitation.

As a culmination of this sinister policy, the Peruvian State kidnapped his corpse, and in the height of perfidy, violating its entire legal system, like a police State, they burned his body and

made his remains disappear, emulating the perversity of the colonial repression against Tupac Amaru.

Their lawyers questioned the regime of confinement, isolation and isolation, through various political instances and judicial demands, including the criminal complaint for torture, discrimination and abuse of authority in 2019, all ignored by blind and deaf justice, giving carte blanche to its criminal action. In 2021, after investigating the barbaric events, a criminal complaint was made for the assassination of Chairman Gonzalo.

Now, two years after this vile homicide, the prosecutor's office files the criminal complaint, seeking to maintain impunity for this crime, demonstrating that it is an instrument of the genocidal policy of the State, which this far-right wing government continues to apply.

The class and the people honor the memory of Chairman Gonzalo, he is respected and loved by millions of children of the people and the proletariat, who fight for the transformation of the system of oppression and capitalist exploitation, for socialism towards communism; and his name, Presidente Gonzalo, and his thought, the Gonzalo thought, will live forever.
